PROFESSIONAL SUMMARY

2026 Computer Science graduate with strong data structures, algorithms and OOP foundations and professional experience building multi-tier systems (frontend, Node.js APIs, relational databases) on the viaSocket SaaS platform (Next.js and Node.js) at Walkover. Delivered 100+ production API integration modules that connect distributed third-party services, shipped a deployed full-stack app with 47 automated tests, and completed a frontend engineering internship. I turn broadly defined problems into working, tested solutions, debug across layers, and explain technical trade-offs clearly.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Java, Python, C++, C, SQL
Full-Stack	Next.js, Node.js, React.js, Express.js, Next.js API Routes, Redux Toolkit, REST APIs, Prisma ORM
CS Fundamentals	Data Structures & Algorithms (Arrays, Trees, Graphs, DP, BFS/Dijkstra, Binary Search), OOP, MVC
APIs & Integration	REST API Design, JSON, OAuth 2.0, Webhooks, Pagination, Axios, Postman, Third-Party Integrations
Databases	SQL, PostgreSQL, MySQL, Prisma ORM, Relational Database Design, Multi-Tier Application Design
Frontend	React.js (Hooks, Props, State), HTML5, CSS3, Tailwind CSS, Bootstrap 5
SDLC & Testing	Agile/Scrum, SDLC, Unit Testing (Jest), Debugging, Code Review, Documentation
Tools	Git, GitHub, Browser DevTools, VS Code, Claude Code, ChatGPT, CI/CD basics
AI & LLM	OpenRouter, Gemini API, LLM Workflows, AI-Assisted Development (responsible, reviewed)

PROFESSIONAL EXPERIENCE

Integration Solution Engineer - Walkover Web Solution (viaSocket) May 2026 - Present

Indore, India (Remote)

- Developed core features for viaSocket, a no-code AI automation platform used by 100,000+ users to automate business workflows across 2,200+ SaaS applications, following established coding standards, source-control practices, and quality guidelines.
- Build and ship features on the viaSocket product, a SaaS platform built on Next.js and Node.js, across the React/Next.js frontend and Node.js backend APIs; write clean, readable, reviewed code and debug production issues across client, API and data layers.
- Designed, developed, tested and maintained 100+ reusable API integration modules in Node.js/JavaScript connecting the viaSocket no-code automation platform to third-party REST APIs, with clean, modular, documented code; built multi-step workflow automations and a full-stack app on the viaSocket SDK.
- Implemented authentication (OAuth 2.0, API keys), webhooks, pagination and JSON data mapping; turned UI/UX designs into complete user flows: dynamic input forms with field validation and clear error handling.
- Tested APIs with Postman against live endpoints (requests, responses, status codes, edge cases); root-caused 4xx/5xx errors and pagination mismatches to improve reliability and resolve defects.
- Collaborated with senior engineers, Product and Design in an Agile team using Git, pull requests and code reviews; wrote technical documentation; use AI coding tools to move faster and test and review every line of AI-assisted code before handoff.

Frontend Developer Intern - Think Debug Feb 2025 - Apr 2025

Indore, India

- Developed 15+ reusable, responsive React.js components (Tailwind CSS, hooks, props, state) consistent across desktop, tablet and mobile.
- Integrated 20+ REST APIs with Axios, handling async data flow, loading and error states; managed shared state with Redux Toolkit.
- Improved frontend performance by 18% by refactoring components and reducing re-renders; debugged and resolved 30+ defects with browser DevTools alongside backend engineers.
- Delivered features on weekly sprint deadlines in a 6-engineer Agile team (Git branching, pull requests, code reviews).

PROJECTS

Meeting-to-Action Closer | Next.js, TypeScript, Prisma, REST APIs meeting-to-action-closer.embarko.app

- Built, deployed and tested end to end (UI, API, database, integrations) a full-stack app that converts meeting transcripts into structured Asana tasks using AI and posts summaries to Slack; task owners update status from Slack, syncing back to Asana.
- Integrated Asana, Slack, Google Calendar and Fireflies REST APIs with authentication, data mapping and error handling; added role-based access control and duplicate-safe database writes.
- Modeled relational data with Prisma ORM; wrote 47 automated tests covering core logic.

SENSAI - AI Career Coach | Next.js, Gemini API, Clerk, Prisma, PostgreSQL

- Built a full-stack AI career coaching app generating resume and interview-prep guidance via Gemini API, each feature behind its own REST API route for modularity.
- Implemented authentication and session management (Clerk); designed and queried PostgreSQL via Prisma ORM; improved load performance by 35% with a modular, API-based architecture.

EDUCATION

B.Tech, Computer Science and Engineering - Medi-Caps University, Indore Aug 2022 - May 2026

CGPA: 7.92/10 | No Backlogs

Class 12 (CBSE) - Keshav International School, Jhabua, MP | 2022 | 81.8%

CERTIFICATIONS & CODING PRACTICE

- IBM DevOps Foundation (2026) | IBM Agentic AI (2026) | IBM Generative AI (2026) | Cisco CCNA (2025)
- Competitive programming and DSA practice in C/C++: dynamic programming, graph algorithms (BFS/Dijkstra), binary search, backtracking, bitmask DP. GitHub: github.com/HiTesHweb07
